

# 843 Response to Request for Quotation

Functional Group ID=**RR**

## Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Response to Request for Quotation Transaction Set (843) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide potential buyers with price, delivery schedule, and other terms from potential sellers of goods and services, in response to a request for such information.

## Notes:

- 1. Provide all mandatory and required segments, data elements, and codes for an offeror to adequately prepare a proposal, quote, or bid. As a general rule, provide any information when it differs from the originating Request for Quotation.*
- 2. This implementation convention can be used to provide a quote in response to a Request for Quote (RFQ), a bid in response to a Invitation for Bid (IFB), a proposal in response to a Request for Proposal (RFP) or an undefinitized contract action, or information in response to a Request for Information (RFI). For simplicity, the term offer will be used in this convention for all the above.*
- 3. This transaction set makes use of code lists contained in the Federal EDI Coding Manual which is available from the National Institute of Standards and technology (NIST) at URL <http://snad.ncsl.nist.gov/fededi/>*
- 4. Within this implementation convention, the phrase "use in conjunction with" indicates a mandatory relationship among codes, data elements, segments, etc., in order to convey a complete data expression. If the mandatory relationship is multi-directional, the phrase will appear in all applicable locations. This phrase is not used when the X12 syntax mandates this relationship.*

**Transaction Set Notes**

1. If segment LIN is used, do not use LIN01.
2. The SCH segment is used to specify various quantities of items ordered that are to be scheduled. When this segment is used the unit of measurement code (SCH02) should always be identical to the unit of measurement code in the associated PO1 segment (PO103) and the sum of values of quantity (SCH01) should always equal the quantity ordered (PO102) in the PO1 segment.
3. Number of line items (CTT01) is the accumulation of the number of PO1 segments. If used, hash total (CTT02) is the sum of the value of quantities ordered (PO102) for each PO1 segment.

<b>Purpose:</b>	To provide a free-form format that allows the transmission of text information
<b>Syntax Notes:</b>	1 If MSG03 is present, then MSG02 is required.
<b>Semantic Notes:</b>	1 MSG03 is the number of lines to advance before printing.
<b>Comments:</b>	1 MSG02 is not related to the specific characteristics of a printer, but identifies top of page, advance a line, etc. 2 If MSG02 is "AA - Advance the specified number of lines before print" then MSG03 is required.
<b>Notes:</b>	<p><i>1. When providing a certification, representation or other fill-in information, the following format is recommended:</i></p> <p style="padding-left: 40px;"><i>a) In the first iteration of the segment, cite the clause title followed by a pipe sign to indicate the end of the title information, then cite the number of fill-ins followed by a second pipe sign to indicate the end of the title segment.</i></p> <p style="padding-left: 40px;"><i>b) For each fill-in, begin a new MSG segment using the sequence in which the fill-ins appear within the clause. If multiple iterations of MSG are required for a long fill-in, end only the last MSG segment of that fill-in with the pipe sign.</i></p> <p><i>3. **Position:** 040  
**Loop:** PO1 Optional  
**Level:** Detail  
**Usage:** Optional  
**Max Use:** >1  
**Purpose:** To specify pricing information

*Use any code to provide information regarding the pricing of an item. The following is a list of preferred codes.*

**CAT** *Catalog Price*

*Use in conjunction with CTP03, to indicate a catalog price if the solicitation requested the offeror to identify the catalog price. Do not use this code when a catalog price is offered in PO104/05.*

**ICL** *Unit Price Through Quantity*

**1. Use in conjunction with CTP02 codes PBQ and MAX, and also with CTP03 to indicate the end of a quantity range applicable to step ladder pricing.**

**2. Step ladder pricing is defined as the price specified for the quantity range containing the quantity purchased, applying to all the items purchased. Use of codes ICL, MAX and PBQ is in contrast to use of code PAQ which identifies quantities at which different prices are applied.**

**LPP Lease to Purchase Price**

**Use in conjunction with CTP03, to indicate a Lease to Purchase price if the solicitation requested the offeror to identify the Lease to Purchase price.**

**MAX Maximum Order Quantity Price**

**1. Use in conjunction with CTP02 codes ICL and PBQ, and also with CTP03, for step ladder pricing, to indicate the quantity above which the price will not change.**

**2. Step ladder pricing is defined as the price specified for the quantity range containing the quantity purchased, applying to all the items purchased. Use of codes ICL, MAX and PBQ is in contrast to use of code PAQ which identifies quantities at which different prices are applied.**

**PAQ Price Break Quantity(s)**

**Use in conjunction with CTP03, to indicate a quantity where an incremental price break occurs. For example, if price breaks occur at quantities 11, 21, 31, etc., then for a purchase quantity of 25, the first 10 units are at the first price, the next 10 units are at the second price and the last 5 units are at the third price. This is in contrast to step ladder prices where all 25 units are one price.**

**PBQ Unit Price Beginning Quantity**

**1. Use in conjunction with CTP02 codes ICL and MAX, to indicate the beginning of a quantity range applicable to step ladder pricing.**

**2. Step ladder pricing is defined as the price specified for the quantity range containing the quantity purchased, applying to all the items purchased. Use of codes ICL, MAX and PBQ is in contrast to use of code PAQ which identifies quantities at which different prices are applied.**

**Segment:** **PO4** Item Physical Details  
**Position:** 090  
**Loop:** PO1 Optional  
**Level:** Detail  
**Usage:** Optional  
**Max Use:** >1  
**Purpose:** To specify the physical qualities, packaging, weights, and dimensions relating to the item

- Syntax Notes:**
- 1 If either PO402 or PO403 is present, then the other is required.
  - 2 If PO405 is present, then PO406 is required.
  - 3 If either PO406 or PO407 is present, then the other is required.
  - 4 If either PO408 or PO409 is present, then the other is required.
  - 5 If PO410 is present, then PO413 is required.
  - 6 If PO411 is present, then PO413 is required.
  - 7 If PO412 is present, then PO413 is required.
  - 8 If PO413 is present, then at least one of PO410 PO411 or PO412 is required.
  - 9 If PO417 is present, then PO416 is required.
  - 10 If PO418 is present, then PO404 is required.

- Semantic Notes:**
- 1 PO415 is used to indicate the relative layer of this package or range of packages within the layers of packaging. Relative Position 1 (value R1) is the innermost package.
  - 2 PO416 is the package identifier or the beginning package identifier in a range of identifiers.
  - 3 PO417 is the ending package identifier in a range of identifiers.
  - 4 PO418 is the number of packages in this layer.

- Comments:**
- 1 PO403 - The "Unit or Basis for Measure Code" in this segment position is for purposes of defining the pack (PO401) /size (PO402) measure which indicates the quantity in the inner pack unit. For example: If the carton contains 24 12 -Ounce packages, it would be described as follows: Data element 356 = "24"; Data element 357 = "12"; Data element 355 = "OZ".
  - 2 PO413 defines the unit of measure for PO410, PO411, and PO412.

**Notes:**

1. *Use this segment to specify the weight, cube, or dimensions of the unit or intermediate pack; the unit pack quantity or intermediate container quantity. To specify the unit pack quantity, use PO401 and PO404 (code UNT). If there are 50 pairs in a unit container, PO401 would cite 50 and PO404 would cite code UNT.*

2. *If it is necessary to specify not only the quantity of items in a unit container, but also the size and unit of measure of those items, use PO401, PO402, PO403 and PO404. In this instance, if there are 24, 12 ounce bottles in the unit container, PO401 would cite 24, PO402 would cite 12, PO403 would cite code OZ and PO404 would cite code UNT. In either of these examples, the number of unit containers in an intermediate container would be carried in PO414. If only the quantity per intermediate container is required, use code INT in PO404 and cite the quantity in PO414.*

3. *Use this segment when the offer differs from the solicitation requirements or to*

*provide information essential to the offer.*
